Education

University of Washington Expected Jun 2028
Bachelor of Science in ***Applied Mathematics: Data Science*** ***GPA: 3.8***

Experience

MORSE Corp Jan 2027 – Jun 2027
Incoming Machine Learning Co-op *Seattle, WA*

- Sponsored for Department of Defense U.S. Security Clearance
- Expected to work on Machine Learning CI/CD for deployed models

Jiu-Jitsu Analytics Oct 2025 – Present
Founder, Data Scientist *Seattle, WA*
Built a jiu-jitsu web app transforming footage into user-specific data analytics and advice

- Trained a position **classification model** in PyTorch Python for core footage-analysis feature reaching **93% accuracy**
- Built the **analytics dashboard** to deliver the product's core user-facing service
- Designed and **ran an A/B test** on gym-partner referrals vs. cold signups **on customer churn** to redirect marketing strategy
- Instrumented the full upload-analysis-report funnel in SQL and built a Tableau dashboard to surface an 18% drop-off at video processing, driving key pipeline-latency fix

Sensors Energy and Automation Lab Jun 2026 – Sep 2026
Undergraduate Researcher *Seattle, WA*

- Performed **data analysis in Databricks using SQL** on sensor-data and visualized it in a **Tableau dashboard saving 4hrs / week**
- Created an AWS cloud database including schema design, RESTful API calls, and data pipelines
- Shipped a Retrieval-Augmented Generation (**RAG**) system for an embedded AI product **reducing hallucinations by 72%**

Projects

UFC Prediction Model | *Python, Playwright, Pandas, PostgreSQL*

- **Scraped and cleaned 3M+ datapoints to train an uncertainty-quantified, explainable classification model**
- Scheduled cron job to automatically retrain the model after every UFC event
- Deployed model on public website via cloud database reaching 200+ monthly visits

Quantitative Skill Data Analysis | *Python, Pandas*

- Analyzed 700K+ data job postings in Python Pandas in order to measure skill frequency and median pay across 150+ skills
- Applied multi-variable Pareto optimization technique in order to determine optimal skills

Retail Data Analysis | *PostgreSQL, Python, Pandas, SARIMA*

- Cleaned, performed EDA and analyzed 500K+ datapoints using PostgreSQL and Python-Pandas in order to find year-over-year (YoY) growth, seasonality, cohort analysis, and evaluate SARIMA forecasting model

Technical Skills

Languages: Python, PostgreSQL / SQL, Git / GitHub, Tableau, AWS, Databricks
Libraries: Pandas, scikit-learn, Langchain, PyTorch, seaborn, matplotlib
Concepts: Statistical Modeling, Hypothesis Testing, A/B Testing, Regression and Classification, Experimental Design

Awards

- **DubHacks '26 Winner (800 participants, $2K prize)**
- Salutatorian '25
- Top Math Student '24 (High School)
